Conclusion

Assets for Valuation:

The net revenue from the biomass power plant of BEC and BPC to BRRGIF consists of:

- 1) The net revenue of BEC since the appraisal date on 30 September 2025, from 1 October 2025 to 10 August 2028 (remaining period 2.86 years).
- 2) The net revenue of BPC since the appraisal date on 30 September 2025, from 1 October 2025 to 6 April 2035 (remaining period 9.51 years).

Objective of Appraisal:

To be applied for public accounting purpose, and insurance purpose.

Overall Business:

Both biomass power plants are micro-sized renewable energy power plants, with the capacity of electricity sold into each system not more than 10 megawatts, and with the objective to generate electricity from renewable energy using biomass fuel for the production, such as bagasse to be burned for heat as energy for boiling water in steam boilers, so that the high-pressure steam will be generated to rotate steam turbines connected to a generator, then the electricity will be generated to further supply to electricity transmission lines of the PEA.
